EXPERIENCE

Apr 2025 -

Present

Caesar · Head of Product

Joined the founding team to lead product for Caesar, a launched deep-research AI platform with 1,000+ users and state-of-the-art HLE evaluation scores.

Jan 2023 -

Apr 2025

Momentify / Pitchr · Founder

Founded and built two AI/crypto product experiments: AI-augmented live music experiences and AI-generated founder sales pitches. Shut both down after customer discovery; lessons fed into Oh.

CURRENT

Caesar

Head of Product · Deep-research AI platform.

Oh

Co-founder · Stealth hardware AI product.

Nov 2019 -

Nov 2021

SenseOn · Head of Product

Led product from seed to Series A for an early AI-powered cybersecurity system combining network, device, and open-source data with ML models to detect and autonomously remediate threats.

Jun 2017 -

Nov 2019

Triptease · Head of Data Products

Led internal and customer-facing data products at a Series A/B-stage travel-tech startup, supporting hotel pricing, performance, and commercial decision-making across the platform.

EDUCATION

University of York

BSc Economics

Aug 2006 -

Dec 2016

UK government, national security contractor · Program Lead

Led technical and product-like programs across secure infrastructure, physical security, networking, and digital intelligence systems. Later led cross-agency data and application-sharing work.

TOOLS

Claude · Codex · TypeScript · Python · Postgres · Vercel · agentic tooling

Oct 2004 -

Aug 2006

GCHQ contractor · Digital programs

Worked on digital intelligence programs generating insights from packet-level internet data, starting in technical and product support roles across early internet-scale systems.
